Subject Index Volume 28

Bacteria, 1

Charge density, 161
Charge distribution, 39
Charge relaxation, 175
Charge transfers, 199
Charged device model, 253
Corona discharge, 1, 149
Coronas, 187

Damping, 89
Deutsch model calculations, 149
Device, 39

Electro rheology, 89
Electrostatic discharges (ESD), 199, 219, 241, 253, 285, 301
Electrostatic motor, 7
Electro-thermal modelling, 285

Fine particles, 161
Finite element analysis, 7
Flow sensors, 47

Golay codes, 47

Human body model, 301
Hydrocarbon fuels, 66, 99, 125

Ignition hazards, 66, 99, 125
Ions, 187

Latent damage, 241
Lightly doped drain devices, 219

Medicine, 1
Microactuators, 7
Micromotors, 7
MOSFET, 241

Output protection, 219

Partially filled vessels, 175
Powder flow, 47
Protection circuits, 301
Pulverised coal, 47

Road tankers, 66, 99, 125

Semiconductor failure, 285
Space charge, 187
Surface charge density, 161
Surface conduction, 175

Transducer, 7

Vibration, 89
